Hiring Manager

Zeotap

Subject: Application for Software Engineering Intern Position

Dear Hiring Manager,

I am writing to express my interest in the Software Engineering Intern position at Zeotap. As a third-year Computer Science Engineering student at Chandigarh University, I have built a strong foundation in data structures, algorithms, and full-stack development. I am excited about the opportunity to contribute to a data-driven company like Zeotap, where I can apply my skills to real-world challenges.

I have completed multiple hands-on projects including a full-stack "DSA Hub" web application using the MERN stack and a personal portfolio site using React and Tailwind CSS. These experiences have not only improved my technical skills but also taught me to collaborate effectively in agile environments and build user-centric, scalable applications. Additionally, I have solved over 500 problems on LeetCode, consistently improving my problem-solving abilities.

Zeotap's focus on customer intelligence and its use of technologies like Java, Play Framework, and GCP align perfectly with my interest in backend systems and scalable architectures. I am a fast learner, enthusiastic about exploring cloud platforms and building high-performance APIs.

I would love the opportunity to contribute to your team and grow as an engineer under the guidance of professionals at Zeotap. Thank you for considering my application. I look forward to the possibility of discussing this further.

Warm regards,

Prachi Sharma
